

# Made in Japan

# 匠の技 が生む

**Where  
Craftsmanship  
Meets Performance.**

Built on decades of Japanese manufacturing excellence.  
Airtec Drain Timer Valves are not just parts.  
They are precision-engineered solutions,  
hand-finished by master craftsmen to deliver zero waste  
and long-lasting performance.  
Trusted by industries worldwide,  
our valves ensure consistent uptime, reduced maintenance,  
and lower operating costs.

# Applications

## – Focus on Steel & Auto-motive Industry

### Recommended Installation

Large scale air tank

tip of the tank

water-cooled after cooler

discharge drain

tank and separator

Large air filter

Large air dryer

for vertical piping use

piping elbow

Manually  
open and close  
the valve

**Currently, someone has to walk over and manually discharge the drain.**

**How about automating it?**

— Our new Box-In type product is performing well when installed alongside compressors. —

## Not Just a Valve. A Standard of Reliability.

### Senior Engineers' Expertise

Designed and overseen by senior engineers with decades of proven expertise.

### Hand-Finished Quality

Every valve is finished by skilled craftsmen, ensuring precision in every detail.

### Uncompromising Testing

Built under strict quality control to deliver stable performance, even in the harshest conditions.

Made in Japan. Trusted in India.  
With the pride of 'Made in Japan',  
Airtec ensures safe, efficient, and reliable operations  
for India's leading factories and steel plants.
